PORTFOLIO SAMPLE

STANDARD OPERATING PROCEDURE

Order Processing & Fulfillment

Sample Business	Bloom & Co. — Online Gift Shop
Document ID	SOP-001
Version	1.0
Prepared by	Documentation & Administrative VA
Last Updated	September 2026

Sample Project — Fictional Business Scenario

1. Purpose

This SOP provides a clear and consistent process for receiving, verifying, recording, monitoring, and completing customer orders from order confirmation through fulfillment.

2. Scope & Responsibility

Primary: Administrative Assistant

Supporting: Sales / Fulfillment Team

Applies to: All customer orders processed through the business's designated order channels.

3. Required Information

Category	Required Details
Customer	Name and contact information
Order	Order number, product, quantity, price
Delivery	Delivery address / shipping details
Payment	Payment status / confirmation
Fulfillment	Expected ship date, courier, tracking number

4. Order Processing Workflow

Follow the sequence below for every order and update the Order Tracker as each stage is completed.

1 RECEIVE ORDER	2 VERIFY DETAILS	3 RECORD ORDER	4 CONFIRM PAYMENT	5 PREPARE FULFILLMEN T	6 MONITOR SHIPMENT	7 UPDATE RECORDS
--	---	---	--	---	---	---

Step 1 — Receive Order

Check the designated sales/order channel and collect the order details.

Step 2 — Verify Order Information

Confirm customer name, order number, products, quantity, price, delivery information, and payment status. Request clarification if information is missing.

Step 3 — Record Order

Enter the order into the Order Tracker, including order date, customer, product, quantity, payment status, order status, and expected ship date.

Step 4 — Confirm Payment

Verify payment using the designated payment record or system. If unpaid, mark as Payment Pending and follow up.

Step 5 — Prepare for Fulfillment

Send the confirmed order details to the fulfillment team and update Order Status to Processing.

Step 6 — Monitor Fulfillment

Check whether the order has been prepared and shipped. Record shipping date, courier, and tracking number, then update the status to Shipped.

Step 7 — Update Records

Review the order record for completeness and accuracy and ensure all relevant information is saved and organized.

5. Exception Handling

Situation	Required Action
Missing customer information	Request missing details before processing.
Payment not confirmed	Mark as Payment Pending and follow up.
Product unavailable	Notify the responsible team and update order status.
Shipping delay	Record the delay and notify the appropriate person/customer.
Incorrect order information	Verify against the original source before making changes.
Missing tracking number	Follow up with the fulfillment or shipping team.

6. Order Completion Checklist

- ☐ Order information verified
- ☐ Payment status confirmed
- ☐ Order recorded in tracker
- ☐ Fulfillment team notified
- ☐ Shipping information updated
- ☐ Tracking number recorded
- ☐ Final order status updated
- ☐ Records complete and organized

7. Portfolio Case Study

Challenge

The fictional business needed a consistent order-processing procedure so recurring tasks would be handled consistently and important steps would be less likely to be missed.

What I Created

A step-by-step SOP covering order intake, verification, recording, payment confirmation, fulfillment coordination, shipment monitoring, exception handling, and final record updates.

Skills Demonstrated

SOP Creation • Process Documentation • Administrative Support • Order Coordination • Records Management • Spreadsheet/Tracker Support • Follow-Up Management

Business Value

Creates a repeatable process, clarifies responsibilities, reduces avoidable missed steps, and makes it easier for another team member to follow the workflow.

Note: This is a fictional portfolio sample created to demonstrate documentation and administrative capabilities. It is not presented as client work.
